SP16

08/50740/3 (UK) - Issue 3

 The product complies with the European Safety Standards EN60335-2-30 and the European Standard Electromagnetic Compatibility (EMC) EN55014, EN60555-2 and EN60555-3 These cover the essential requirements of EEC Directives 2006/95/EC and 2004/108/EC

SP16 Wall Fire

IMPORTANT: THESE INSTRUCTIONS SHOULD BE READ CAREFULLY AND RETAINED FOR FUTURE REFERENCE

Important Safety Advice

When using electrical appliances, basic precautions should be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

If the appliance is damaged, check immediately with the supplier before installation and operation.

Do not use this heater in the immediate surroundings of a bath, shower or swimming pool.

Do not use outdoors.

Do not cover or obstruct the heater in any way. Overheating will result if it is accidentally covered.

Ensure that furniture, curtains or other combustible material are positioned no closer than 1 metre from the heater.

In the event of a fault unplug the heater.

Unplug the heater when not required for long periods.

The supply cord is recommended to be placed on the right hand side of the heater. The heater can also be HARD wired - this is recommended if the heater is recessed - see 'Recessed Installation'.

This appliance is not intended for use by children or other persons without assistance or supervision if their physical, sensory or mental capabilities prevent them from using it safely. Children should be supervised to ensure that they do not play with the appliance.

If the supply cord is damaged it must be replaced by the manufacturer or service agent or similarly qualified person in order to avoid a hazard.

The appliance must not be located beneath a socket outlet.

Where an appliance is recessed, necessity to allow disconnection of the appliance from the electrical supply is required. Incorporate a switch in the fixed wiring in accordance with the Wiring regulations.

Warning : In order to avoid a hazard due to inadvertent resetting of the thermal cutout, this appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by the utility.

Electrical

WARNING – THIS APPLIANCE MUST BE EARTHED

This heater must be used on an AC ~ supply only and the voltage marked on the heater must correspond to the supply voltage.

Do not switch the appliance on until properly installed. Please read all the safety warnings and operating instructions.

General

Unpack the heater carefully and retain the packaging for possible future use, in the event of moving or returning the fire to your supplier.

Contents of Carton

- Heater.
- Wall fixing bracket.
- Fixing screws and wall plugs.
- Remote control and batteries (AAA's type).
- Spare bulb.

Do not connect the heater to an electricity supply until it is installed on a wall correctly - see 'Installation'.

A choice of 1KW or 2KW heat output is provided by the fan heaters which are concealed within the unit.

The heater can be used remotely or manually - see 'Operation'.

General features of remote control are:

- Heat output can be increased or decreased according to your particular requirements
- The illumination of fuel effect can be increased or decreased.

Please note: Used in an environment where background noise is very low, it may be possible to hear the motor which operates the flame effect. This is normal and should not be a cause for concern.

Installation

Do not connect appliance until properly fixed to the wall and the Instruction leaflet is read fully.

The minimum distances must be observed.

For installation of the appliance, care must be taken not to damage concealed cables.

Please be careful while drilling the holes.

This model is designed to be permanently fixed to a wall at a minimum height of 300mm. The wall bracket must be fitted horizontally and the cable routed to the bottom right of the appliance as in Fig. 1.

A height of 600mm from bottom of heater to floor is recommended for optimum viewing of fuel bed (see Fig. 2 for recommended fixing dimensions).

For optimum viewing mark the top four screw fixing positions on wall in accordance with the recommended fixing dimensions - see Fig. 2. Drill holes with a 6mm drill bit. Fix the wall bracket using the plugs and screws provided - see Fig. 3.

Carefully lift the heater up ensuring that the top rear ledge of heater engages the wall bracket and is sitting centrally positioned. - see Fig. 4 (b).

Rotate the bottom fixing bracket down. - see Fig. 4 (c).

Gently bring the heater level with the wall - see Fig. 4 (d).

Mark the bottom hole position (see Fig. 5), remove the heater ensuring that the bottom fixing bracket is rotated up.

Drill and fit wall plug.

Refit the heater to the wall fixing bracket (i.e. follow steps as in **Fig. 4 a, b, c and d**) and rotate the bottom fixing bracket down again and use the screw provided to permanently fix the heater in place.

The heater should not be connected until the instruction leaflet is read fully.

Recessed Installation

Please note that this appliance can also be wall-mounted so that it is recessed. This can be installed in a large fireplace opening or a purpose built wall. See Table 1 for size of recess required and hole fixing dimensions and **Fig. 5a**. This fireplace insert does NOT require venting.

In order to ensure it's future safety in use, it is essential that this fire is securely fixed to the wall.

IT IS IMPORTANT THAT THE FIXING DEVICE CHOSEN IS APPROPRIATE TO THE WALL MATERIAL TO WHICH THE FIRE IS BEING FIXED. SOME MODERN INTERNAL BUILDING MATERIALS ARE VERY LOW DENSITY BLOCK AND REQUIRE SPECIALIZED FIXING DEVICES TO PROVIDE A SAFE, SECURE INSTALLATION.

The installation of this fire should be carried out by a competent person. If in doubt please consult your local builder.

This section provides step by step instructions for selecting a location and preparing the site to install the fireplace into the following:

Existing Fireplace

1. Make sure that the fire is located on a flat surface.
2. Seal all draughts and vents to prevent chimney debris from falling onto the Fireplace Insert. Do not install into an existing fireplace that is prone to dampness.
3. Remove the fire front panel by following the steps as outlined in 'Lamp Replacement' sections.
4. Locate the 4 fixing holes, position the fire accordingly, and firmly fix the appliance to the wall using the appropriate screws - see **Fig. 5a**.
5. Replace the front panel.

New Support Structure Construction

When planning where to position your purpose built support structure the following steps must be observed:

1. Place the fire in the desired location to see how it will look in the room.
2. Mark the desired location for the new support structure in the room and store the fire in a safe, dry and dust free location.
3. Using timber studs to support the fire, devise and construct a suitable means of supporting the product within the wall partition and provide electrical power for the fire to be HARD wired. For recommended sizes of height, width and depth of opening for recess and hole fixing dimensions for each model - see Table 1 and **Fig. 5a**.
4. When the structure is complete, remove the front panel of the fire by following the steps as outlined in 'Lamp Replacement' sections.
5. Locate the 4 fixing holes, position the fire accordingly, and firmly fix using the appropriate screws.
6. Replace the front panel.

TABLE 1

A	X	Y	Z
1160	1143	520	146

NOTE: The appliance should be HARD wired to an electrical power outlet when placed in a recessed installation. Please consult a qualified electrician for appropriate wiring requirements.

Manual Operation

The switches are located at the bottom right side of the appliance - see **Fig. 6**.

Remote Operation

The standby switch (S1) must first be turned 'ON'.

Note: It takes some time for the receiver to respond to the transmitter. DO NOT PRESS the buttons more than once within two seconds for correct operation.

Manual & Remote Operation

Setting	Operation	Setting
Flame Effect		Top Neon
Flame Effect & 1kw Heat	Press the 'I' button	Middle Neon
Flame Effect & 2kw Heat	Press the 'I' button again	Bottom Neon

The Standby switch must first be turned 'ON' to operate the appliance manually or by remote control.

Note: It takes some time for the receiver to respond to the transmitter. DO NOT PRESS the buttons more than once within two seconds for correct operation.

To go to the previous settings press the **O** button.

Pressing the **O** button on the remote turns off the appliance. To turn the appliance back On press the **I** button - see **Fig. 8**.

To increase or decrease the brightness of the flames, use the dimmer button or the **Q** button on the Remote Control.

To turn off the power the Standby Switch must be turned 'OFF'.

Lamp Replacement

WARNING – ALWAYS DISCONNECT FROM THE POWER SUPPLY BEFORE REMOVING LAMPS.

Warning - The lamps reach high temperatures during operation. For this reason, allow the lamps to cool down after switching off the appliance.

The front panel will need to be removed in order to change lamps – see Fig. 9.

Warning - The front panel is heavy and easily damaged.

The front panel is supported at the top by two brackets and held tight by magnets at the bottom.

To gain access to lamps please apply the following procedure:

While holding the front panel by its sides with both hands, (1) carefully tilt the bottom of the frame outwards until free and then lift the panel up (2) and then away (3) from the main body - see Fig. 9.

To gain access to the bulbs remove the screws at 'A' to remove the cover bracket 'X' and the screws at 'B' to remove the cover bracket 'Y' - see Fig. 10.

To access the bottom bulbs, carefully slide the flexible rotisserie to one side ensuring that the rubber grommet is not lost - see Fig. 11.

Remove the defective lamp by unscrewing it - see Fig. 11.

Replace with a 60W E14 SES Clear Candle bulb, rotating it. Take care not to over-tighten the lamp.

Steps for reassembling the appliance

1. Refit the rotisserie making sure that the rubber grommet is carefully pushed into the slotted hole on the axial bracket.
2. Replace the cover brackets 'X' and 'Y' - see Fig. 10.
3. Replace the front by aligning the slots at top of the front frame with the support brackets on the chassis and ensuring it catches fully on the support brackets. The magnets on the chassis will hold the front flush to the main body.

Thermal Safety Cut-out

For your safety, this appliance has been fitted with 2 thermal cut-outs. In the event that the product overheats, the cut-out switches the heat off automatically on the defective side.

To bring the heat back into operation, remove the cause of the overheating, then unplug or turn off the electrical supply to the heater for up to 10 minutes.

When the heater has cooled sufficiently, re-connect and switch on the heater.

Cleaning

WARNING – ALWAYS DISCONNECT FROM THE POWER SUPPLY BEFORE CLEANING THE APPLIANCE.

For general cleaning use a soft clean duster – never use abrasive cleaners. The glass viewing screen should be cleaned carefully with a soft cloth. DO NOT use proprietary glass cleaners.

Recycling

For electrical products sold within the European Community.

At the end of the electrical products useful life it should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice in your country.

After Sales Service

Your product is guaranteed for one year from the date of purchase.

Within this period, we undertake to repair or exchange this product free of charge (excluding lamps & subject to availability) provided it has been installed and operated in accordance with these instructions.

Your rights under this guarantee are additional to your statutory rights, which in turn are not affected by this guarantee.

Should you require after sales information or assistance with this product please go to www.dimplex.co.uk where you will find our self help guide by clicking on "After Sales" or ring our helpdesk on 0845 600 5111 (UK) or 01 842 4833 (R.O.I.) .

Spare parts are also available on the website

www.dimplex.co.uk

Please retain your receipt as proof of purchase.
